Ercros sponsors the Ercros FDP Award - Hydrogen Foundation Aragón

Francisco Gracia, head of basic chemistry R+D at Ercros, presented the award

Ercros has once again participated in the awards ceremony of the Hydrogen Aragón Foundation, held last November 20 as part of the II Hydrogen Week of Aragón. The company sponsors the Ercros-Hydrogen Aragón Foundation Award for the Best Final Degree Project, an initiative aimed at recognizing the talent and innovation of future professionals in fields related to the energy transition and hydrogen.

In this sixth edition, the award has been granted to Jorge Legaz Ruiz for his Final Degree Project entitled "Decarbonization of blast furnaces through biomass pyrolysis and power to gas" in which he analyzes alternatives to reduce CO_2 emissions in the steel industry through biomass utilization and the integration of solutions based on renewable hydrogen..

Representing Ercros was Francisco Gracia, head of Basic Chemistry R+D and member of the jury evaluating these awards.

The Hydrogen Foundation Aragón Awards annually recognize the best academic works and projects related to the development of hydrogen and other innovative energy technologies, promoting collaboration between academia, research, and industry.
