

Marc Fargas lectures on the importance of chemistry in our lives

The director of Ercros Complex in Tarragona, Marc Fargas, spoke on "Chemistry in our homes" a lecture on the important role of chemistry in our lives. The conference took place in Mont-Roig del Camp, organized by the Centre d'Estudis Mont-roigencs and the Chemical Business Association of Tarragona (AEQT) whose communication commission chairs Marc Fargas.

During the conference, which was attended by more than fifty people, the director of Tarragona Complex highlighted the progress, importance and contribution of chemistry to the welfare of mankind. He also pointed the solutions that chemistry provides to the problems of today's world, emphasizing its impact on the economy of the Tarragona region.

On the other hand, Marc Fargas was also responsible for introducing the chemical cluster of Tarragona, ChemMed, to Repsol's public advisory panel, as a member of the board of ChemMed and chairman of AEQT communication commission.
