

Ercros certifies its sustainable practices in the PVC and vinyl chloride production with the ECVM Charter

Ercros has obtained certification of compliance with the voluntary ECVM Industry Charter program, promoted by the European Council of Vinyl Chloride and PVC Manufacturers (ECVM).

The companies associated with this program commit to meeting high standards of control over processes and operations during the manufacture and use of EDC, VCM and PVC. In the case of Ercros, the manufacturing of these products is carried out in the Vila-seca II factory (Tarragona).

ECVM has commissioned the audit process to the external certification body Dekra, GmbH, on the data submitted in 2022 and 2023.

All information about the ECVM Charter certificate and other certifications, [here](#).
