

## **The Ercros factory in Sabiñánigo participates at the job fair of the Pirámide Institute of Huesca**

The Ercros factory in Sabiñánigo has participated in the V edition of the Vocational Training Job Fair, held at the Pirámide public vocational training centre in Huesca. This event, which has established itself as a meeting point between the educational and business worlds, brought together 60 companies from different sectors in order to bring the labour market closer to students.

On behalf of Ercros, María Gella Girón, head of the personnel management and administration area, and Patricia Vera, an internship student, attended to the students interested in learning about the professional opportunities offered by the Sabiñánigo factory. During the day, they explained the profiles most in demand by the company and resolved doubts about labour integration in the industrial chemical sector.

In addition, visitors to the stand were able to learn about some of the centre's emblematic products, such as TCCA tablets for the disinfection of swimming pool water that are exported from Sabiñánigo to different countries around the world.

The conference allowed for the sharing of experiences, awakening vocations and strengthening ties between the industry and the professionals who will shape the productive fabric of the future.
