

## Visit to the CRAM Foundation for staff from outside Barcelona

This Saturday, Ercros organized a visit to the Foundation for the Conservation and Recovery of Marine Animals (CRAM) for workers from factories outside Barcelona and their families.

Staff from the Sabiñánigo, Almussafes and Tortosa centres did not want to miss a guided tour of the foundation's facilities, where they could see the turtles that remain in the ponds recovering before returning to the marine environment.

They also learned aspects about other species such as the sharks that live in the Mediterranean Sea, although some of the smaller and more advanced attendees already had extensive knowledge of the information provided.

The visitors applauded the initiative to open these visits to all Ercros centres and assured that, in this way, they had an excuse to visit Barcelona, in some cases, and the Port Aventura amusement park, in others.
