

Ercros collaborates with the Aranjuez Film Festival

Ercros participates as a sponsor, together with various local public and private entities, in the Aranjuez Film Festival, Arancine, which is held from October 30 to November 8.

The company thus joins an initiative that celebrates the talent, creativity and link between cinema and the identity of Aranjuez, a town where Ercros has been present since 1951 through a factory dedicated to the production and sale of generic active pharmaceutical ingredients (APIs), mainly in the field of antibiotics.

This is the second edition of Arancine, which offers a careful selection of national and local short films, accompanied by an extensive program of parallel activities, such as round tables, cultural walks, exhibitions and concerts.

The event aspires to consolidate itself as a cultural and cinematographic reference, recovering the spirit of the historic film festival that took place in Aranjuez in the 1970s and 1980s. The aim is to promote Aranjuez as a cinematographic territory, both professionally – highlighting the potential of the region as a filming location – and culturally, encouraging interaction between the different arts.
