

Ferrán Castellón, new director of Information Systems at Ercros

Ercros has appointed Ferrán Castellón Blesa as Director of Information Systems, replacing Eduardo Gual, who leaves the company after more than 50 years in the position, and whom the company thanks for his years of dedication and the work carried out at the head of this area.

Born in Barcelona in 1960, Ferrán Castellón trained in Telecommunications Engineering. He began his professional career in 1989 as an external collaborator at the Cros Joint Stock Company, in the Information Systems area, and joined the staff permanently in 1998, at Erkimia, S.A.

Throughout his career at the company, he has developed his work in the field of data systems and infrastructures. Currently, he is Head of Systems and Director of Information Security (CISO) at Ercros.
