

Ercros participates in a video made by people with disabilities and promoted by CADIS Huesca

Elena Simón, with the authors of the video, at one point in the recording

Elena Simón, director of the Ercros factory in Sabiñánigo, has participated in an inclusive video prepared by people with disabilities linked to the Coordinator of Associations of People with Disabilities (CADIS) of Huesca. The video premiered at the Casa de la Cultura in Sabiñánigo.

The project, baptized as Display, is a pioneering initiative in which people with disabilities are the protagonists and carry out the entire audiovisual production process.

In this new chapter, recorded in Sabiñánigo, the team reviews the main values of the town and its surroundings. Along with the participation of Elena Simón, the report includes interventions by prominent figures such as the scientist Carlos López Otín, the cyclist Jorge Arcas and the mayor Berta Fernández, as well as representatives of companies and social entities in the territory.
