

**Ercros scores 85 points in the EcoVadis assessment  
and is awarded the Gold medal**

Ercros has achieved a score of 85 out of 100 in the sustainability assessment carried out by EcoVadis. With this result, the company ranks in the 98th percentile, meaning that its performance is equal to or higher than that of 98% of the more than 130,000 companies assessed by this organisation. This rating has enabled Ercros to obtain the Gold medal, one of the highest distinctions granted by EcoVadis.

In the breakdown by area, the scores for environment and ethics stand out, with 91 points out of 100 in both cases, as well as 90 points in labour practices and human rights. In its general observations, EcoVadis notes that Ercros has an advanced management system in place in the areas of environmental performance, labour relations and human rights, and fair business practices.

EcoVadis also highlights as a key strength that Ercros has provided a large number of key performance indicators across most of the topics assessed. Likewise, Ercros achieved the maximum score, 100 out of 100, in the sections on endorsements, measures and certifications, which respectively assess public commitments to international goals and principles, the actions implemented to support sustainability policies, and the existence of certifications demonstrating compliance with recognised standards.
