

Ercros participates in the *Opportunities within your reach* event to bring industrial employment closer to young people

The Ercros factory in Sabiñánigo participated in the *Opportunities Within Your Reach* event, organized by the Alto Gállego and La Jacetania region through its Youth Departments and with the collaboration of business and educational institutions. The event, held at Pirenarium, brought together nearly 350 young people with the aim of introducing them to training opportunities and job prospects in their area.

Ercros had its own information booth where it presented its activities, as well as the professional profiles and job opportunities related to the chemical-industrial sector. Ercros representatives interacted directly with attendees, answering questions and providing insights into the realities of the workplace.

This participation reinforces Ercros' commitment to promoting young talent and its connection to the local community.
