Almussafes participates in the IV Convention on Industrial Safety

The Almussafes factory has participated in the IV Convention on Industrial Safety and Emergency Management of the industrial areas of Almussafes, organized by the EGM Juan Carlos I, with the collaboration of the town council and the General Directorate of Industry.

The head of industrial safety at the Almussafes factory, Paula Capella, spoke at the event, in which more than 70 people participated, with the presentation "Seveso Company: how industrial safety and emergencies are managed every day in a chemical plant".

After this edition, Ercros adds its presence, once again, to this day of training and coordination to move towards safer, more prepared and resilient industrial areas in the face of possible emergencies.
