

## **Ercros foresees to obtain a profit of EUR 27 million in the first half**

Ercros expects to obtain an ebitda of EUR 41 million and a profit of EUR 27 million in the first six months of 2018. Regarding the first half of 2017, this forecast implies increasing ebitda by 6.4% and the result of the period by 12.7%.

The estimate, which was made based on the results closed until May and the visibility of the market in June, reflects the maintenance of the activity profile for the first quarter of the year and the favourable situation of the main markets in which Ercros operates. Likewise, and despite the fact that the second half of the year includes the months of August and December, which are seasonally low, the estimated improvement allows to visualize a good result for the whole 2018.
